

ABOUT US

The Radian story begins with a community striving for inclusion, and business allies committed to workforce evolution. Together, leadership from The Arc San Francisco and inclusion experts from a range of industries have designed a strategic approach to helping companies meet diversity, equity and inclusion goals.

Radian offers clients an innovative, collaborative approach to meeting DEI goals through strategic and scalable engagement with the developmental disability talent pool through thought partnership, program planning, employee education and training.

WHAT MAKES RADIAN UNIQUE?

As a specialized consulting resource developed by The Arc San Francisco, the Radian team draws on decades of experience supporting over 150 Bay Area businesses in diversifying their workplaces and hiring employees from the neurodiversity community.

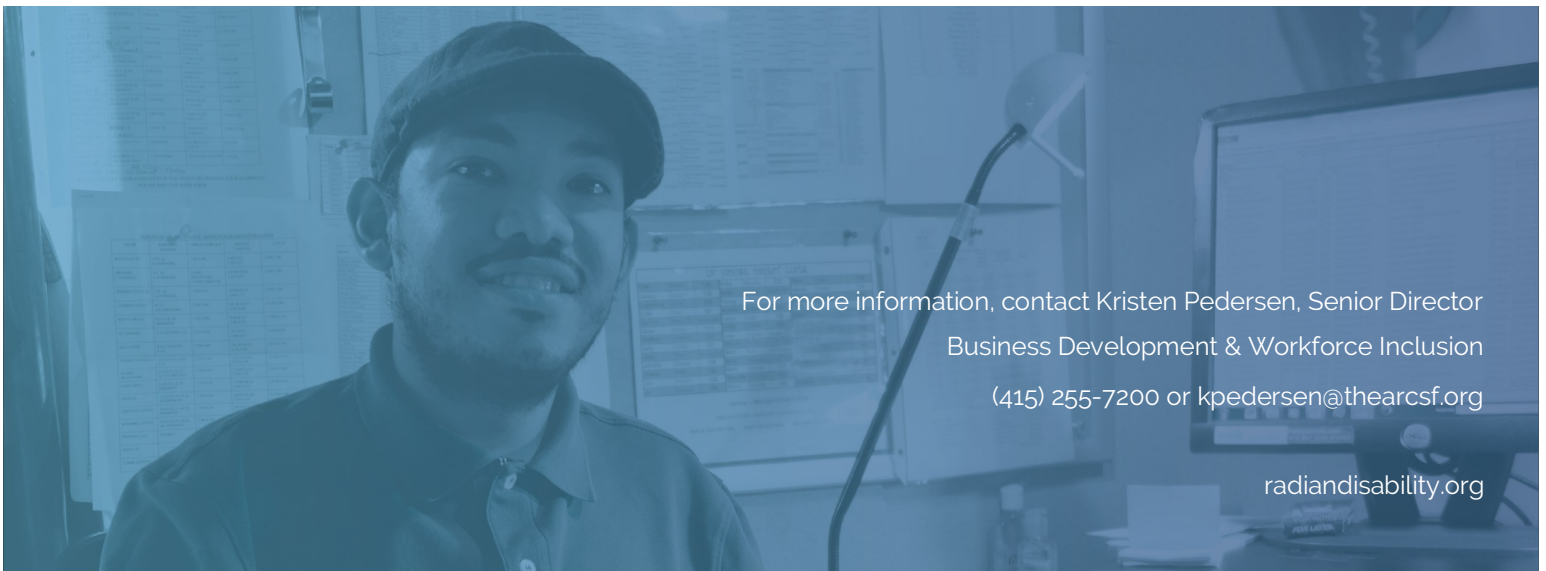

THE RADIAN APPROACH

We begin with helping clients assess current inclusion practices, business needs and goals.

We then provide insight and strategies for building a stronger, broader inclusion program through expanded recruitment channels, hiring best practices, awareness training and mentorship programs.

OUR MISSION

To advance a culture of disability inclusion and belonging across all business sectors.
